

## Come Join Us!

Our award-winning Sensory Garden was established to provide adults with diverse backgrounds, capabilities and interests with 'up close' gardening experiences. Our gardens are designed to invigorate your senses.

During the garden tour, visitors are encouraged to interact with the plants using their eyes, ears, nose and hands. Guests will also enjoy our visiting creatures

- birds, butterflies, frogs and insects. Hands-on

activities after the tour provide visitors with an

opportunity to take home a memento of their Sensory Garden visit. Our gardens are tended by a dedicated team of Rutgers Master Gardeners.

The Sensory Garden was established in support of the Rotary & Rutgers Enabling Garden initiative to provide audiences of diverse backgrounds, capabilities and interests with a gardening experience
